

# Information Technology

## Where Can We Take You?

### Studying **business**?

Make yourself more marketable by double majoring in CIS or MIS. The information technology background will give you a boost when you look for a job.

### Want to work in **health care**?

Minor in information technology! In the fast-paced health care field, you will need to access, store, and analyze patient information quickly, efficiently, and accurately. Information technology courses will help you learn the skills you need to succeed.

### Want to be a **teacher**?

Want to be a teacher? Take courses in information technology! You'll learn skills you need to teach with technology. You can also treat your "tech savvy" students to an immersive learning experience using web-based simulations, virtual project based learning, or digital story production.
