

what do **you** want to be?

**information
technology:**
not your father's
cubicle anymore!

A Biologist

The Human Genome Project, cancer studies, and stem cell research rely now more than ever on information technology. Become part of bioinformatics, a branch of biology busting with career opportunities for those who want to help others.

An Artist

Do you express yourself with paint, charcoal, and clay? Learn how to publicize your artwork on the web, enhance your paintings with graphics software, and animate your work through digital media effects.

A Musician?

Are you the next OK Go, Moby, or Gorillaz? All of these musicians used computer technology to create, mix, remix their music, and design music videos for fans. Information technology is essential for your success in the music business.
