

Certified Information Security Manager (CISM)

Course Hours: 75 hours

Duration: 6 months

Summary

In the InfoSec world, security managers are the driving force behind an organization's cybersecurity policies. These key individuals typically started their IT careers in hands-on roles before earning their CISM certification and taking on managerial duties. If you're ready to earn your next IT certification, this online training course will fully prepare you for the ISACA Certified Information Security Manager (CISM) certification exam. This course offers enrollment with or without a voucher. The voucher is prepaid access to sit for the certifying exam upon eligibility. Proctor fees may apply, which are not included.

Details + Objectives

What You Will Learn

- Recognize the security role to manage and improve information security governance processes that support an information security strategy
- Interpret the methods to ensure the information security program provides benefits while supporting business operations
- Analyze the methods and strategies in classifying information assets to confirm protective measures are proportional to their business value
- Demonstrate the ability in accurately classifying and categorizing information security incidents to guarantee effective reactions
