ELEVATING CONVERSATIONS FOR CHANGE

DENVER, CO. MAY 18-19
The NCWIT SUMMIT is the world’s largest convening of change leaders focused on diversity, equity, and inclusion in computing.

This May, nearly 500 educators, entrepreneurs, corporate executives, and social scientists from across industries and disciplines will convene in Denver, CO to participate in the NCWIT Summit. NCWIT is the trusted source for research-based strategies and tools that facilitate systemic reform in computing classrooms and technology workplaces.

NCWIT member representatives, notable field experts, and renowned guests present and learn about leading-edge practices, give and receive encouragement, network, and form partnerships.

NCWIT and our annual Summit are all about fixing systems, not people. Our research-based approach is about improving the environment for everyone. The Summit equips change leaders to address organizational culture and make systemic change. It is not a convening of technical women or a recruiting event. It’s an event with a unique focus on organizational leaders who are making their cultures inclusive.
